

Buffered Controllers Speed Up Tape Processing.

Canadian Datasystems , Volume: 15 , Number: 5 , Page: 61 , May , 1983

Storage Technology Corp. has announced the development of buffered tape controllers for its tape drives. The buffered controllers manage data movement to and from the tape drives independent of the channel. The major benefits of buffered tape are faster tape processing, more efficient use of system resources and protection of investment in 9-track tape technology.
