

Disk Disasters.

Datamation , Volume: 30 , Number: 18 , Page: 73 , Nov. 1 , 1984

IBM's domination of the mainframe 3380-class disk drive market has given Storage Technology Corp. serious financial woes and has caused Control Data Corp. to leave the mainframe disk drive business completely. The impact of this competition on both companies will cause the loss of two to three thousand jobs. It has also caused Storage Technology over \$40 million dollars in losses in 1984, and will cause CDC to take a quarterly loss, its first in ten years.
